Subject: Meeting Minutes – Rivendell Council Event & Provider Requirements

Hi Arwen,

Following our discussion, I'm sending over the main points from the meeting regarding the event we're planning and the requirements we should use when contacting potential providers.

We are currently looking for a suitable, accessible venue and event setup for approximately 45 attendees. The space should allow for comfortable standing circulation and provide sufficient access for food service.

The venue should have a dedicated area where we can accommodate short acoustic performances without obstructing guest circulation or emergency access. An outdoor segment could also be included, but only if the venue has a compliant and directly accessible outdoor performance area and all relevant local safety and access requirements are met.

For the event services, the main requirements discussed were:

- **Dinner:** fondue food station, with approximately 2 hours of service for all participants.
- **Music:** two short acoustic sets, approximately 8 minutes each.
- **Optional outdoor performance:** a 10-minute horn segment, subject to the venue providing an appropriate outdoor space.

Please use these points as the baseline requirements when identifying and comparing potential providers.

Best,

Elrond Peredhel
